

## Coldr - Folder Colorizer

A simple Unity Editor tool that allows you to color-code your project folders for better organization.

### Features

- **Quick Color Cycling**: Press F1 to cycle through colors
- **Customizable Colors**: Add, remove, and modify colors in the preferences
- **Persistent Colors**: Colors are saved and persist across Unity sessions
- **Easy Reset**: Reset to original colors or clear all folder colors
- **Unity Shortcut Manager**: Use Unity's built-in shortcut system for maximum flexibility

### Installation

1. Import the package into your Unity project
2. The tool will automatically initialize
3. Access settings via `Edit > Preferences > Coldr`

### Usage

#### Quick Start

1. Select any folder in the Project window
2. Press **F1** to cycle through colors
3. Use right-click menu: `Assets > Coldr > Cycle Folder Color`

#### Customizing Colors

1. Go to `Edit > Preferences > Coldr`
2. Modify existing colors or add new ones
3. Use "Reset to Original Colors" to restore defaults
4. Use "Clear All Folder Colors" to remove all colors

#### Changing Shortcut

1. Go to `Edit > Shortcuts`
2. Search for "Coldr/Cycle Folder Color"
3. Set your preferred shortcut

#### Default Colors

The tool comes with 6 beautiful soft colors:

- Soft Pink
- Soft Mint
- Soft Lavender
- Soft Cream
- Soft Purple
- Soft Sky

#### Requirements

- Unity 2020.3 LTS or newer
- No additional dependencies
